
THE CENTER FOR MEDICAL WEIGHT LOSS - GRAND OPENING OF DR. ZACHARY VERES' WARREN, OHIO CENTER

Warren, OH – November 17, 2014 – The Center for Medical Weight Loss is the first national network of physicians to bring trained medical expertise to the field of commercial weight loss. The Center is excited to announce the opening of its newest location in Warren, OH under the direction of Dr. Zachary Veres. The Center for Medical Weight Loss offers clients a long term weight loss approach managed with the full support of certified medical professionals.

The Center helps patients reach a safe and healthy target weight quickly. Most important, they teach clients how to maintain their weight loss permanently by adopting healthy habits in place of their addictions.

“Excessive weight needs to be treated as a disease,” states the Center for Medical Weight Loss – a group of physicians that are Certified Weight Loss professionals. They fully understand the complex factors that are related to weight gain: individual psychology, contributing illnesses, prescription medication and the genetics of individual body composition.

Whether suffering from severe health issues due to extreme excess weight or merely looking to lose 15-20 lbs. for cosmetic reasons, all clients receive a full medical consultation. This includes a detailed scientific measurement of their body mass & basal metabolic rate to accurately predict weight loss.

Each fully individualized program is supported with on-going one-on-one care including nutrition, fitness, medication, behavioral motivation and counseling. Physicians at The Center for Medical Weight Loss use the latest techniques and medical data available in the field of Obesity Medicine, including access to high quality nutritional products only available to medical doctors. Also available to clients: are the latest FDA approved weight loss medications.

The average weight loss result experienced by a Center for Medical Weight Loss client is 21 lbs. in four weeks. In addition to the weight loss itself, associated health benefits are multiple. They include: a decrease in dependence on blood pressure, diabetes and cholesterol medications, as well as lower risk of chronic diseases, such as congestive heart failure, clinical depression, sleep apnea and lymphedema.

Dr. Veres' aim when opening the Center for Medical Weight Loss is to simply provide people with weight issues access to compassionate, dedicated professional specialists. However, successful clients who have reached and maintained their weight loss goals talk about the Center as a life-changing and in many cases life-saving experience!
